PUZZLES & CROSSWORDS | CLASS 1 - 3 | SPATIAL REASONING

Join the Stars Orion: Constellation Map

*Curated by Dr. Maya Patel * Companion: "Why Marks Alone Are Not Enough in Today's Education System" * 6 min read*

ACTIVITY OVERVIEW

Connect the dots and map the night sky constellations while developing pencil grip and spatial reasoning.

KEY SKILL FOCUS:

Dot to Dot | Constellation | Fine Motor

EDUCATIONAL CONTEXT:

The Indian education system has made significant progress, but it still focuses heavily on academic scores. Discover why understanding a child's cognitive development is equally

*Target: Home & Classroom * Low-Ink Design * 15-20 Min*

PARENT & EDUCATOR DISCUSSION GUIDE * COGNITIVE SPARKS

REFLECT & CONNECT

01 Research-backed cognitive developmental milestones.

02 Actionable takeaways for Indian classrooms and home environments.

03 Promoting growth, not comparisons, aligned with NEP 2020.

Name: _____ Class: _____ Date: _____

1 Join the Stars: Orion

AGES 6 – 11

★ ★ ★ ★ ★

Orion the Hunter is one of the most famous star groups in the night sky. Join the dots in order, then invent a constellation of your very own!

ORION THE HUNTER – join the dots 1 to 6, then back to 1

Bonus: join 6 – B – 3 to draw Orion's belt, then link the head star H to stars 1 and 2.

INVENT YOUR OWN CONSTELLATION

Its name: _____

ITS LEGEND – why is it in the sky?

_____

_____

★ **STAR CHALLENGE**

Ages 6–8: Join the dots and colour the stars gold.

Ages 9–11: Write a legend: why is your constellation up in the sky?
